

# Empyrean Outsourced ALM

Sophisticated Risk Analytics to Scale With Your Needs

For community banks and credit unions, effectively managing risk is critical - but maintaining an in-house ALM function can be costly and resource-intensive. Empyrean's Outsourced ALM services deliver powerful risk analytics through our industry-leading modeling engine, while offering unmatched flexibility to scale and adapt as your needs evolve.

## Service Fit for Purpose

**Empyrean Outsourced ALM** provides standardized risk analysis delivered when you need it (quarterly or monthly), ideal for institutions seeking baseline regulatory reporting and analysis. We fit your data into our pre-built balance sheet structure for efficient processing.

**Empyrean Outsourced Plus** is suited for institutions with more customized modeling needs; our Plus offering allows you to define custom balance sheet structures, assumptions, and organizational hierarchies - all while maintaining an outsourced operating model.

### Seamless Path to In-House

Empyrean's team of financial practitioners are the industry experts in enabling a true outsourced-to-insource transition for ALM. Move to running the exact same powerful modeling engine completely in-house without a costly re-implementation.

### Suite of Integrated Solutions

Unlike single-service outsource providers, Empyrean's ALM solutions integrate with our full suite of software solutions like budgeting, liquidity analysis, deposit studies and more for a holistic risk and planning management approach.

### Banking is Our Focus

All of Empyrean Solutions' products are built and developed to solve some of the key challenges facing banks and credit unions - no other industry. Our ALM model and integrated products are continuously developed by our product and technical services teams, which means our customers should never anticipate a gap in service or product sundown.

### Tenured ALM Experience

Our consultants have decades of hands-on ALM modeling and advisory experience, ensuring expert guidance.

### Interactive Reporting & Advice

In addition to standard model outputs, clients can leverage our dynamic, visual reporting and expert guidance through Empyrean advisory services.

## About Empyrean Solutions

Empyrean Solutions is a leading software and services provider dedicated to solving the complexities of risk management, strategic planning, and profitability for financial institutions at every level. Led and built by financial practitioners with decades of experience, Empyrean's market-leading cloud-based technology empowers bankers to navigate their financials with confidence, enabling them to better serve their stakeholders and communities.
